

### Indicator 7: Proportion of pupils starting grade 1 who reach last grade of primary

In the period 2004/2005 this indicator was formulated as "Proportion of pupils strating grade 1 who reach grade 5".

A new formulation used is "Percentage of pupils starting grade I who reach last grade of primary ". So instead grade 5, now it is "last grade".

Previously we took numbers for those pupils who reach the V grade, but the new calculation are based on those who reach the IV grade .

**Note:** The data refer to the BEGINNING of the school years (First and last grade from primary education).

**Method of computation:** For the calculation of this indicator we took actual numbers of students who enrolled the first grade in a given school year and actual number of students who enrolled IV grade (after 4 years). The indicator is calculated as percent of those who enrolled IV grade in a given school year , from those who started I grade 4 years before.
